NORTH ATLANTIC RIGHT WHALES WARNING:

From December to March the coastal waters between Altamaha Sound, GA, and Sebastian Inlet, FL, are used as calving grounds by the severely endangered North Atlantic Right Whale. This is the world's only known calving ground for this species. Right Whales are the rarest whales in the world and are protected under law from disturbance or injury by the endangered species act of 1973, and the Marine Mammal Protection act of 1972. Right Whales, especially females and their calves, are slow swimmers and frequently lie at the surface. This behavior makes them vulnerable to collisions with ships, which are a significant source of mortality. Vessels operating within 25 miles of shore between 31-27N and 29-50N and within five miles of shore from 29-50N and 28-00N should take precautions to avoid collisions with Right Whales.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. **It is up to the mariner to decide which chart(s) are to be corrected.** The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97

Corrective Action	Object of Corrective Action				Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

FLORIDA- TAMPA BAY ENTRANCE- TAMPA BAY: Marine Advisory.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

FLORIDA - INTRACOASTAL WATERWAY - CHARLOTTE HARBOR TO TAMPA BAY: Hazard to Navigation. (Updated)

The Coast Guard has received a report of a possible submerged object in the vicinity of the center span of the Ringling Bridge.

On February 10, 2006 three (3) temporary buoys were deployed south of the new Ringling Causeway Bridge, in Sarasota Bay to mark submerged rocks that could pose a hazard to navigation during high tides. All three (3) buoys are east of the Gulf Intracoastal Waterway outside of the marked channel. The buoys are a standard, white, cylindrical information buoy. The buoys are anchored in place either on or in close proximity to the submerged rocks.

The buoys are one (1) foot in diameter and approximately 5 ½ feet tall, marked with a orange diamond shape and worded HAZARD. The approximate positions of the buoys are:

1. 27-19-52.620N 082-33-24.060W
2. 27-19-52.920N 082-33-23.220W
3. 27-19-53.940N 082-33-22.080W

It is requested that all mariners exercise caution when transiting this area.

NORTH ATLANTIC RIGHT WHALES WARNING:

From December to March the coastal waters between Altamaha Sound, GA, and Sebastian Inlet, FL, are used as calving grounds by the severely endangered North Atlantic Right Whale. This is the world's only known calving ground for this species. Right Whales are the rarest whales in the world and are protected under law from disturbance or injury by the endangered species act of 1973, and the Marine Mammal Protection act of 1972. Right Whales, especially females and their calves, are slow swimmers and frequently lie at the surface. This behavior makes them vulnerable to collisions with ships, which are a significant source of mortality. Vessels operating within 25 miles of shore between 31-27N and 29-50N and within five miles of shore from 29-50N and 28-00N should take precautions to avoid collisions with Right Whales.

Intentional close approach to right whales is prohibited and is a violation of federal law. A minimum distance of 457 meters (500 yards) must be maintained of a right whale. If a dead or entangled right whale is sighted, report it immediately to the nearest Coast Guard unit via VHF-FM radio. Additional information about right whales is available in the U.S. Coast Pilot.

U.S. Mandatory Ship Reporting System (WHALESSOUTH)

The U.S. Coast Guard will commence operation of the mandatory ship reporting (MSR) system (**WHALESSOUTH**) from November 15 to April 15, in conjunction with the northern right whale calving season. All vessels, 300 gross tons or greater, shall report to the Coast Guard prior to entering the southeast reporting area. Reports are required during a single voyage (that is, a voyage in which a ship is in the area to visit one or more ports or traverse the area enroute to a port outside the reporting area). Ships are not required to report when leaving port or when exiting the system. Ships submitting reports will receive a reply message via INMARSAT C containing the most recent Right Whale sighting information, along with recommendations for avoiding collisions with Right Whales. The MSR system was adopted by International Maritime Organization (IMO) Resolution A. 858(20) in accordance with the International Convention for the Safety of Life at Sea 1974 (SOLAS 74). Sovereign immune vessels are exempt from the requirement to report, but are encouraged to participate. No commercially sensitive information is being requested.

REPORTING AREA

- a. **WHALESSOUTH:** The geographical boundaries of the southeast reporting system include coastal waters within about 25 nautical miles along a 90 nautical mile stretch of the Atlantic seaboard in Florida and Georgia. The area extends from the shoreline east to longitude 80°51.60'W with the southern and northern boundaries at latitude 30°00.00'N and 31°27.00'N, respectively. NOAA Chart No. 11009.

REPORTING METHOD

- a. Vessels are required to report specific ship information to the Coast Guard upon entry into the reporting area. Direct reports should be made via INMARSAT C to one of the below addresses.
E-mail: RightWhale.MSR@noaa.gov or Telex: 236737831
- b. Vessels not equipped with INMARSAT C should report directly to one of the below addresses via alternate satellite communications equipment.
E-mail: RightWhale.MSR@noaa.gov or Telex: 236737831
- c. Vessels unable to use satellite communications equipment should contact the U.S. Coast Guard Communication Area Master Station, Chesapeake, VA via SITOR/NBDP on 8426.3 kHz, 12590.8 kHz, 16817.8 kHz twenty four hours per day, or 6314.3 kHz from 2300 GMT until 1100 GMT and 22387.8 kHz from 1100 GMT until 2300 GMT.
- d. Vessels unable to use satellite communications or SITOR/NBDP should contact the U.S. Coast Guard Communication Area Master Station, Chesapeake, VA via published voice frequencies.

REPORTING INSTRUCTIONS

- a. Vessels shall report the following information in accordance with the IMO format in Resolution A. 648(16) General Principles for Ship Reporting Systems and Ship Reporting Requirements.

Paragraph	Function	Information Required
System name	System identifier	WHALESSOUTH.
M	INMARSAT number	Vessel INMARSAT number.

A	Ship	Vessel name and call sign.
B	Date, time, and month of report	Six digit group giving day of month and time, single letter indicating time zone, and three letters indicating month.
E	True course	3-digit number indicating true course.
F	Speed in knots and tenths	3-digit group indicating knots and tenths.
H	Date, time, and point of entry into system	Date and time expressed as in (B) and latitude and longitude expressed as a four digit group giving latitude, the letter N indicating north, followed by a /, a five digit group giving longitude, and the letter W indicating west.
I	Destination and ETA	Name of port and arrival time expressed as in (B).
L	Route information	Route information should be reported as either a direct rhumbline to port (RL) and intended speed expressed as in (F), or a series of way points (WP). Vessels reporting waypoints should include latitude and longitude, expressed as in (H), and intended speed between waypoints. For vessels transiting within a traffic separation scheme (TSS), give only the waypoints and intended speed for entry and departure of TSS.

- b. Reports shall follow the prescribed format shown below. Reports should be sent as a direct email to RightWhale.MSR@noaa.gov or telex to **236737831**. Use of batch message routing services may delay receipt of a report. Proper format is required to ensure receipt of reply message. Including extra information, extra characters, or double spacing may result in failure of the system to send a reply message:

1. DUE TO CONTINUING CONDITIONS OF ARMED CONFLICT AND LAWLESSNESS IN SOMALIA AND WATERS OFF ITS COAST, MARINERS ARE ADVISED TO AVOID THE PORT OF MUQDISHO (MOGADISHU) AND TO REMAIN AT LEAST 200 NAUTICAL MILES DISTANT FROM THE SOMALI COAST. THE U.S. GOVERNMENT DOES NOT HAVE AN EMBASSY IN SOMALIA AND CANNOT PROVIDE SERVICES TO US CITIZENS.
2. RECENT VESSEL HIJACKINGS OFF THE EAST COAST OF SOMALIA DEMONSTRATE THAT PIRATES ARE ABLE TO CONDUCT AT SEA HIJACKINGS FROM AS FAR SOUTH AS KISMAAYO (CHISIMAYU) (00-22S), THOUGH VESSELS ARE ADVISED TO TRANSIT NO CLOSER THAN 02-00S, TO AS FAR NORTH AS EYL (08-00N), AND OUT TO A DISTANCE OF 170 MILES. THE FIRST KNOWN ATTEMPT TO HIJACK A CRUISE VESSEL OCCURRED IN NOVEMBER 2005. ALL MERCHANT VESSELS TRANSITING THE COAST OF SOMALIA, NO MATTER HOW FAR OFFSHORE, SHOULD INCREASE ANTI-PIRACY PRECAUTIONS AND MAINTAIN A HEIGHTENED STATE OF VIGILANCE. PIRATES ARE REPORTED TO HAVE USED PREVIOUSLY HIJACKED SHIPS AS BASES FOR FURTHER ATTACKS.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages

**POSSIBLE SUBMERGED HAZARDS/DEMOLITION DEBRIS IN COOPER RIVER
SHALLOWS FOR DURATION OF GRACE AND PEARMAN BRIDGE DEMOLITION**

Boaters are advised to stay in the main channel when transiting under the new Ravenel Bridge on the Cooper River. The South Carolina Department of Transportation and their demolition contractor are in the process of removing the remaining foundations for the Grace and Pearman bridges. This project will continue into 2007. During this period, there is the possibility of both partially submerged hazards and demolition debris in the areas outside the main channel. The contractor's work area will be marked with temporary buoys, but these buoys may not be visible at night. To avoid hazards boaters should transit only through the main Cooper River channel (HOG ISLAND REACH) or should consider using Town Creek channel as an alternate route.

Boaters are also reminded to obey Navigation Rule 9 and give large ships the right of way while in or planning to cross the main channel. Vessels less than 20 meters long, and sailing vessels, shall not impede the passage of a vessel that can safely navigate only within a narrow channel.

The U.S. Coast Guard has designated the waters under the old and new bridges as a Regulated Navigation Area (shown below in purple). All vessels are prohibited from anchoring, mooring, or loitering within the regulated area, unless specifically authorized by the U.S. Coast Guard.

Boaters should contact Coast Guard Sector Charleston's 24x7 operations center on VHF channel 16 or via phone at (843) 724-7616 to report any concerns or ask any questions about this notice.

Port of Palm Beach Draft Restriction – Update #1

Time: 1600/Date: September 11, 2006

The Army Corps of Engineers has completed soundings of the Lake Worth Inlet entrance channel and found shoaling caused by Tropical Depression ERNESTO to be extensive throughout the area. The Captain of the Port has imposed a draft restriction of 28 feet at high water slack on all inbound vessel, 27 feet for vessels carrying oil products, and 29 feet for all outbound vessels. These restrictions will remain in effect until further notice. Palm Beach Harbor Pilots may impose additional restrictions as conditions warrant, in coordination with the Captain of the Port.

The Captain of the Port may be reached at telephone (305) 535-8701, or via Channel 16 VHF FM Marine Radio through Coast Guard Sector Miami.

§117.35 Temporary change to a drawbridge operating schedule.

(a) For any temporary change to the operating schedule of a drawbridge, lasting less than or equal to 180 days, the District Commander may issue a deviation approval letter to the bridge owner and publish a "Notice of deviation from drawbridge regulation" in the **Federal Register**.

(b) If the time period for a temporary change to the operating schedule of a drawbridge will be greater than 180 days, the District Commander will follow appropriate rulemaking procedures and publish a temporary rule in the **Federal Register** prior to the start of the action.

(c) *Request for change.* (1) To temporarily change the drawbridge-operating requirements the bridge owner must submit a written request to the District Commander for approval of the change.

(2) The request must describe the reason for the closure and the dates and times scheduled for the start and end of the change.

(3) Requests should be submitted as early as possible, preferably 90 days before the start of the action. District Commanders have discretion to accept requests submitted less than 90 days before a needed change if those requests can be processed before the date of the needed change.

(d) *Determination.* The District Commander's determination to allow the schedule change is normally forwarded to the bridge owner within ten working days after receipt of the request. If the request is denied, the reasons for the denial

will be set out in the District Commander's decision letter.

(e) The drawbridge must return to its regular operating schedule immediately at the end of the designated time period.

(f) If the authorized closure period for an event is broken into separate time periods on the same day or on consecutive days, the drawbridge must provide openings for navigation between the authorized closures.

(g) The District Commander will also announce the change to the operating schedule in the Local Notice to Mariners and other appropriate local media.

§117.36 Closure of drawbridge for emergency repair.

(a) When a drawbridge unexpectedly becomes inoperable, or should be immediately rendered inoperable because of mechanical failure or structural defect, the drawbridge owner must notify the District Commander of the closure without delay and give the reason for the emergency closure of the drawbridge and an estimated time when the drawbridge will be returned to operating condition.

(b) The District Commander will notify mariners about the drawbridge status through Broadcast Notices to Mariners, Local Notice to Mariners and any other appropriate local media.

(c) Repair work under this section must be performed with all due speed in order to return the drawbridge to operation as soon as possible.

§117.37 [Removed].

§117.39 Authorized closure of drawbridge due to infrequent requests for openings.

(a) When there have been no requests for drawbridge openings for at least two years, a bridge owner may request in writing that the District Commander authorize the drawbridge to remain closed to navigation and to be untended.

(b) The District Commander may:

(1) Authorize the closure of the drawbridge;

(2) Set out any conditions in addition to the requirement in paragraph (d): and

(3) Revoke an authorization and order the drawbridge returned to operation when necessary.

(c) All drawbridges authorized to remain closed to navigation, under this section, must be maintained in operable condition.

(d) Authorization under this section does not:

(1) Authorize physical changes to the drawbridge structure, or

(2) Authorize removal of the operating machinery.

(e) Drawbridges authorized under this section to remain closed to navigation and to be untended are identified in subpart B of this part.

§117.40 Advance notice for drawbridge opening.

(a) Upon written request by the owner of a drawbridge, the District Commander may authorize a drawbridge to operate under an advance notice for opening. The drawbridge tender, after receiving the advance notice, must open the drawbridge at the requested time and allow for a reasonable delay in arrival of the vessel giving the advance notice.

(b) If the request is approved, a description of the advanced notice for the drawbridge will be added to subpart B of this part.

§117.41 Maintaining drawbridges in the fully open position.

(a) Drawbridges permanently maintained in the fully open to navigation position may discontinue drawtender service as long as the drawbridge remains fully open to navigation. The drawbridge must remain in the fully open position until drawtender service is restored.

(b) If a drawbridge is normally maintained in the fully open to navigation position, but closes to navigation for the passage of pedestrian, vehicular, rail, or other traffic, the drawbridge must be tended unless:

(1) Special operating requirements are established in subpart B of this part for that drawbridge; or

(2) The drawbridge is remotely operated or automated.

§117.42 Remotely operated and automated drawbridges.

(a) Upon written request by the owner of a drawbridge, the District Commander may authorize a drawbridge to operate under an automated system or from a remote location.

(b) If the request is approved, a description of the full operation of the remotely operated or automated drawbridge will be added to subpart B of this part.

§117.1 Purpose.

(a) This part prescribes the general and special drawbridge operating regulations that apply to the drawbridges across the navigable waters of the United States and its territories. The authority to regulate drawbridges across the navigable waters of the United States is vested in the Secretary of Homeland Security.

(b) Subpart A contains the general operation requirements that apply to all drawbridges.

(c) Subpart B contains specific requirements for operation of individual drawbridges. These requirements are in addition to or vary from the general requirements in Subpart A. Specific sections in subpart B that vary from a general requirement in Subpart A supersede the general requirement. All other general requirements in Subpart A, that are not at variance, apply to the drawbridges and removable span bridges listed in Subpart B.

§117.3 [Removed].

§117.4 Definitions.

The following definitions apply to this part:

Appurtenance means an attachment or accessory extending beyond the hull or superstructure that is not an integral part of the vessel and is not needed for a vessel's piloting, propelling, controlling, or collision avoidance capabilities.

Automated drawbridge means a drawbridge that is operated by an automated mechanism, not a drawtender. An automated drawbridge is normally kept in the open to navigation position and closes when the mechanism is activated.

Deviation means a District Commander's action authorizing a drawbridge owner to temporarily not comply with the drawbridge opening requirements in this part.

Drawbridge means a bridge with an operational span that is intended to be opened for the passage of waterway traffic.

Drawspan means the operational span of a drawbridge.

Lowerable means a non-structural vessel appurtenance that is or can be made flexible, hinged, collapsible, or telescopic so that it can be mechanically or manually lowered.

Nonstructural means that the item is not rigidly fixed to the vessel and can be relocated or altered.

Not essential to navigation means that a nonstructural vessel appurtenance, when in the lowered position, would not adversely affect the vessel's piloting, propulsion, control, or collision-avoidance capabilities.

Public vessel means a vessel that is owned and operated by the United States Government and is not engaged in commercial service, as defined in 46 U.S.C. 2101.

Remotely operated drawbridge means a drawbridge that is operated by remote control from a location away from the drawbridge.

Removable span bridge means a bridge that requires the complete removal of a span by means other than machinery installed on the bridge to open the bridge to navigation.

Untended means that there is no drawtender at the drawbridge.

§117.5 When the drawbridge must open.

Except as otherwise authorized or required by this part,

drawbridges must open promptly and fully for the passage of vessels when a request or signal to open is given in accordance with this subpart.

§117.7 General requirements of drawbridge owners.

Except for drawbridges that have been authorized, before January 3, 2007, to remain closed to navigation or as otherwise specified in subpart B, drawbridge owners must:

(a) Provide the necessary drawtender(s) for the safe and prompt opening of the drawbridge.

(b) Maintain the working machinery of the drawbridge in good operating condition.

(c) Cycle the drawspan(s) periodically to ensure operation of the drawbridge.

(d) Ensure that the drawbridge operates in accordance with the requirements of this part.

(e) Any drawbridge allowed to remain closed to navigation prior to January 3, 2007, when necessary, must be returned to operable condition within the designated time set forth by the District Commander and will become subject to the requirements of this part.

§117.8 Permanent changes to drawbridge operation.

(a) Anyone may submit a written request to the District Commander for a permanent change to a drawbridge operating requirement. The request must include documentation supporting or justifying the requested change.

(b) If after evaluating the request, the District Commander determines that the requested change is not needed, he or she will respond to the request in writing and provide the reasons for denial of the requested change.

(c) If the District Commander decides that a change may be needed, he or she will begin a rulemaking to implement the change.

Subpart B-Specific Requirements

§117.51 General.

The drawbridges in this subpart are listed by the state in which they are located and by the waterway they cross. Waterways are arranged alphabetically by state. The drawbridges listed under a waterway are generally arranged in order from the mouth of the waterway moving upstream. The drawbridges on the Atlantic Intracoastal Waterway are listed from north to south and on the Gulf Intracoastal Waterway from east to west.

§117.53 [Removed].

§117.55 Posting of requirements.

(a) The owner of each drawbridge under this subpart, other than removable span bridges, must ensure that a sign summarizing the requirements in this subpart applicable to the drawbridge is posted both upstream and downstream of the drawbridge. The requirements to be posted need not include those in Subpart A or §§117.51 through 117.59 of this part.
